Dear Mr.Kodayari:

The Mill Valley Demolition Project is a high profile project for the Bay Area. Numerous Federal, State, County, and City agencies, both State and Federal Congressional seats, and national and local wildlife and environmental organizations have been active for many years to return the area at the top of Mt. Tamalpais to its natural condition.

Davy through the Sacramento PRAC contract with the USACE has successfully completed the demolition and asbestos remediation of the abandoned Air Force Station at the mount's peak. This is the first major step in the reconditioning of the mount.

You, Gazi, Melvin, and the rest of ETS's project staff performed work admirably and were key components to the success of the project.

Congratulations and thank you for a job well done.

Sincerely,
